301 species

E - Wet Tropics endemics
I - Introduced birds

Bird species list by Jo Wieneke www.nqbirds.com from a number of sources. Produced for BANQ by E Scambler. Names and taxonomic order follow *Systematics and Taxonomy of Australian Birds* by L Christidis and W E Boles (CSIRO, Melbourne, 2008).

The list is a guide to species that birders might reasonably expect to see, across all seasons and a range of conditions. It includes resident birds, seasonal migrants and regular and uncommon visitors, but not vagrants, very rare species and historical records .

WHO ARE WE?

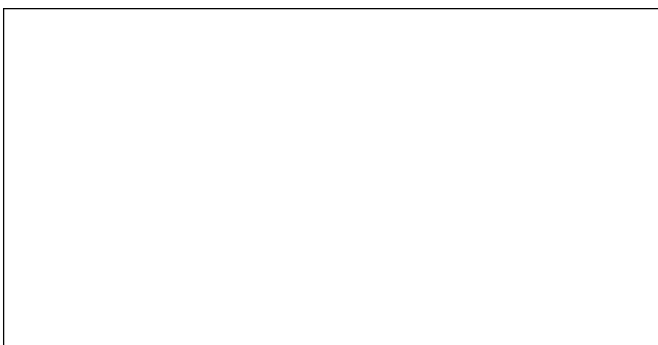

Birds Australia North Queensland (BANQ) is a regional group of the national organisation Birds Australia (Royal Australasian Ornithologists Union, RAOU), formed in 1901 - the oldest Australian society concerned with national and international bird study and conservation.

The BANQ area covers Queensland from Ayr north to the Torres Strait Islands and west to the Northern Territory border. Area representatives are based in Townsville, Mount Isa, Cairns, Atherton Tableland, Mossman/ Daintree, and Cape York.

Members receive a quarterly newsletter *Contact Call* and enjoy Australia's best bird magazine *Wingspan*. Regular field trips and campouts cater for all levels of expertise from beginner to professional and emphasise fun as well as worthwhile projects.

INFORMATION

Innisfail District is a major sugar-cane and tropical fruit growing area surrounded by World Heritage listed rainforest and close to the Great Barrier Reef.

Hundreds of resident and migratory bird species are found in the wide diversity of habitats including rainforest, mangroves, mudflats, beaches, *Melaleuca* forest, swamps and woodland. Sought-after species include the Southern Cassowary, Great-billed Heron, and many Wet Tropics endemic birds including Fernwren, Victoria's Riflebird and Golden and Tooth-billed Bowerbirds.
